

Infusion Pool Products V-Fitting™ Benefits

V-Fittings provide **compliance to ANSI/APSP/ICC-15 2011 standard**, relating to directional inlet fitting requirements, while producing the desired tumbling effect for optimal circulation. **V-Fittings were Voted Best Product 2012 at the Orlando Pool Spa Show! Pool and Spa News readers also voted V-Fittings Top 50 New Products for 2012!**

EASIER TO SERVICE:

- 360 degree adjustability allows for directional control of circulation. Aimed downwards, V-Fittings disrupt debris from side walls and floor increasing the effectiveness of swimming pool filters while preventing sediment buildup.
- Target dead spots, steps and benches eliminating various algae buildup while improving chemical disbursement.
- Complements In-Floor cleaning systems and keeps automatic pool cleaners moving.
- V-Fittings direct water flow in a tumbling motion improving skimmer performance.
- Enhanced circulation creates an easier to service swimming pool saving service professionals time, money and energy.

ENERGY EFFICIENT:

- Increased directional flow enhances circulation providing for a more efficient turnover. Improved turnover and filtration allows for reduced circulating pump operating time.
- V-Fittings' 60 degree venturi deep heats, using warmer surface water, reducing pool heater operating times while improving solar system performance.
- Increased flow highly complements the use of energy efficient circulating pumps.

LOCATION BENEFITS:

- Reduce energy costs
- Deep Heat in colder climates
- Cooling in hotter climates
- Extend the swim season
- Maximize solar system performance
- Enjoy river flow and fountain features
- Improves overall water quality

PRODUCTS V-FITTINGS COMPLEMENT:

- Variable and multi speed circulation pumps
- Solar systems, blankets and rings
- Automatic pool cleaners
- Chemical applicators and chemicals
- Skimmers and swimming pool filters
- Ozone and salt systems
- Pool designs incorporating no main drains
